# Topic : Online Book Store

- Java Project (A1)

# Contents

- ▶ Introduction
- ▶ Objectives
- ▶ Scope
- ▶ Features / Functionality
- ▶ Project Outcomes
- ▶ Technology Stack

# 1. Introduction

- **Problem Identified:**
  - Scarcity of offline stores (2021)
  - Only access to current travelers at that location
  - Time and money taking
  - Have a limited category of product
- **Solution Proposed:**
  - The convenience
  - Shop anytime (24/7)
  - Cost-effective
  - Save your efforts
  - Diversity of products.

## 2. Objectives

- To provide users to purchase a book online.
- To add/delete user, manage their accounts.
- To reduce user's searching time.
- To provide a wide collection of book ranges.
- To provide user-friendly environment.
- To provide the facility of user feedback.
- To provide an sms facility to automatically acknowledge users.

# 3. Scope

- To provide an essence of books/e-books via a simple and yet powerful medium
- To build an application to reduce the manual work for managing the books, customer, stock, and payment
- To built a user-friendly easily accessible application
- To develop easy connectivity between buyers and sellers

## 4. Feature/Functionality

- **Help or Feedback Column**

- If any buyer/customer has any issues regarding products quality, payment method, non-availability of wanted books, etc. can contact us on the help or feedback column.

- **Best Sellers and New Release Books**

- Our customers can receive the latest information like best-selling books or newly released books of every category.

# 5. Outcome of Project

- ▶ Users can log in or register
- ▶ Users can search for options available
- ▶ User will be displayed with books available in the stock
- ▶ Users can buy any books .
- ▶ New users can list themselves and there will much more features included.

# 6. Technology Stack

► Web application built on

Window builder
